

Matter

An appliance can work with one or multiple Matter ecosystems with just Matter connectivity built in. This industry-unifying standard is a promise of reliable, secure connectivity. It is a seal of approval that devices will work seamlessly together – today and tomorrow. Matter creates more connections between more objects, increases compatibility for consumers.

Voice Commands

Thanks to the availability of a wide variety of voice-controllable devices such as Apple, Amazon, and Google, controlling your shades while being completely hands-free is not just possible but really.

Entertainment Scenes

Scenes are some pre-configured settings under a unique name. It is useful for homeowners to streamline their daily routines. A click, timing or action is enough to trigger the scenarios to control multiple smart devices simultaneously.

Easy Configuration

Setting the motor into the smart protocol pairing mode, motor head green light blinks indicating successfully activate the smart mode pairing process, the smart hub will detect and link with the motors automatically.

Bi-directional feedback

Optimize your space with bi-directional feedback technology, your shades position percentage is visible, "battery status" will feedback the real time rest power of the motor and shades.

Family Sharing

Share this smart curtain switch to your family members to share the convenience together. Support one mobile phone to control multiple devices or multiple mobile phones to control one device.
